

PRODUCT SHINE

Description

SHINE is a new super concentrated environmentally friendly vehicle wash detergent system.

SHINE is a super concentrated vehicle wash designed to reduce freight and storage problems while delivering excellent detergent action for washing of all types of light vehicles, plant and equipment. **SHINE** is environmentally acceptable being formulated from readily biodegradable materials providing quick break technology to assist effective operation of waste treatment systems.

Features:

- Excellent cleaning without streaking
- Super concentrated for reduced freight and storage problems
- Quick break detergent for effective waste treatment of wash water
- Non hazardous and biodegradable formulation
- Safe on all surfaces.
- Non toxic and environmentally acceptable.

Directions for Use:

SHINE may be dispensed via the venturi detergent system on most water blasting units or mixed 1 part to 4 parts water and sprayed onto surface via a 5 litre chemical sprayer or with the use of a 4 litre bucket of the premixed solution and a sponge.

SHINE is an excellent choice for washing of workshop floors and general cleaning activities. Dilute 5-10 mls per 4lt bucket for general cleaning using mop. For pressure washing dilute 5 mls in detergent tank of pressure washer before use.

Safety:

SHINE is a non hazardous product and does not present any risks when using.

Consult the Material Safety Data Sheet for more technical information
